BlueCard® Program (out-of-area) Members

BlueCard® is a national program that enables members of any Blue Cross Blue Shield (BCBS) Plan to obtain healthcare services while traveling or living in another BCBS Plan service area. The main identifiers are the prefix and the "suitcase" logo on the member ID card.

The suitcase logo provides the following information about the member:

The PPOB suitcase indicates the member has access to the exchange PPO network, referred to as BlueCard PPO basic.

The PPO suitcase indicates the member is enrolled in a Blue Plan PPO or EPO product.

The empty suitcase indicates the member is enrolled in a Blue Plan traditional, HMO, POS or limited benefits product.

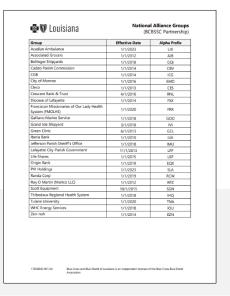

The HPN suitcase logo indicates the member is enrolled in a Blue High Performance NetworkSM (BlueHPN) product.

National Alliance Members

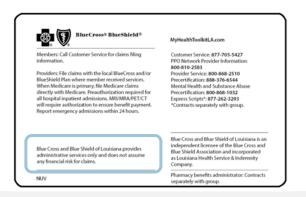

(South Carolina Partnership)

- National Alliance groups are administered through Louisiana Blue's partnership agreement with Blue Cross and Blue Shield of South Carolina (BCBSSC).
- Louisiana Blue taglines are present on the member ID cards; however, customer service, provider service and precertification are handled by BCBSSC.
- Claims are processed through the BlueCard program.

We publish a list of these groups (with prefixes) in iLinkBlue (www.lablue.com/ilinkblue) under the "Resources" section.

For more information about our telemedicine requirements, billing and coding guidelines, see our *Professional Provider Office Manual* at www.lablue.com/providers > Resources > Manuals.

Appropriate Place of Service (POS)

We define DTC telehealth as telehealth services delivered directly between the provider and patient in their home environment (e.g., residence, workplace, personal space, etc.).

- Bill non-DTC telehealth with the appropriate place of service based on the member's location when services are provided.
- For example, if the member is in the inpatient hospital setting when receiving telehealth services, bill POS 21.

 Do not bill POS o2 for telehealth services; Louisiana Blue does not consider POS o2 valid for claims submission. Claims billed with POS o2 may reject.

Telemedicine Codes

The following codes can be used for "Direct-to-consumer" telemedicine—when the telemedicine encounter occurs directly between provider and patient.

OTHER BILLING GUIDELINES

Provisional Billing/Incident-to

"Incident-to" reimbursement rules for providers types that are eligible to participate in our network are as follows:

 If network participation is available for a provider type, then that provider type is required to file claims under their own provider number.
 Services should not be billed under a supervising provider. Providers who are
 considered by Louisiana
 Blue to be in-training
 (residents, students and
 providers with provisional
 licensure) are not eligible to
 bill incident-to services.

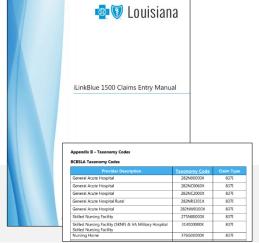

Taxonomy Codes

If you file multiple specialties under your NPI number, it is very important to also include the appropriate taxonomy code that clearly identifies the specialty.

You must file the code for the services on the authorization from Lucet.

Example: A facility that has two specialties with same Tax ID and NPI (e.g., acute and psych) must use a taxonomy code on **all** claims to identify the specialty.

Failure to use a specific taxonomy code will cause payment to be directed to the wrong sub-unit, be paid incorrectly and/or may cause the claims to reject on the Not Accepted Report.

Taxonomy Codes can be found in our *iLinkBlue 1500 Claims Entry Manual* available under the Resources menu in iLinkBlue.

Part 2 Regulations

- Providers and facilities are responsible for making sure they are in compliance with 42 Code of Federal Regulations (CFR) part 2 regulations regarding the Confidentiality of Substance Use Disorder Patient Records.
- Abiding by the part 2 regulations includes the responsibility of obtaining appropriate consent from patients prior to submitting substance use disorder claims or providing substance use disorder information to Louisiana Blue. Louisiana Blue requires that patient consent obtained by the provider include consent to disclose information to Louisiana Blue for claims payment purposes, treatment, and for healthcare operations activities, as provided for in 42 U.S.C. § 290dd-2, and as permitted by the HIPAA regulations. 42 CFR part 2, section 2.31(a) (1-9) stipulates the content that must be included in a patient consent form. By disclosing substance use disorder information to Louisiana Blue, the provider affirms that patient consent has been obtained and is maintained by the provider in accordance with Part 2 regulations. In addition, the provider is responsible for the maintenance of patient consent records.
- Providers should consult legal counsel if they have any questions as to whether or not 42 CFR part 2 regulations are applicable.

PTSD Toolkit

Because treatment of PTSD requires specialized training and intensive, often prolonged, treatment, it is not typically treated in primary care settings. However, PCPs can play a vital role by detecting the presence of PTSD, helping patients understand that they may have PTSD, educating patients about their treatment options and prescribing recommended medication when needed. PCPs can use the PC-PTSD-5 to screen for PTSD. The test is simple, easy to administer and score, and was developed specifically for use in primary care settings.

The following tools are being provided to assist in the identification of PTSD in your patients.

Approximately 22% of all patients who present in healthcare settings have a substance use condition, such as alcohol, opioid, or other drug abuse or dependence. Consequently, medical settings are important places to identify individuals with Substance Use Disorders (SUD), engage them in treatment and begin providing them services. (Urada et al, 2012).

HEDIS®

(FOLLOW-UP AFTER HOSPITALIZATION)

Follow-up After Hospitalization

HEDIS® (Healthcare Effectiveness
Data and Information Set) is an
annual performance measurement
created by the NCQA (National
Committee for Quality Assurance) to
help improve quality of healthcare
and establish accountability.

One measure is ensuring patients who have had inpatient treatment for mental illness have a follow-up visit with a behavioral health professional within seven calendar days of discharge.

- ✓ LUCET tracks
 appointments made
 within seven days, but
 also wants patients to
 attend those
 appointments.
- Patients who attend these scheduled follow-up appointments are less likely to **readmit** into inpatient treatment.

Help Us Meet the Measure

Behavioral health professionals can:

- Schedule patients within seven calendar days of discharge from an inpatient stay.
- These appointments can be made with psychiatrists, psychologist, psychiatric nurse practitioners, social workers (LCSW), counselors (LPC), marriage and family therapist (LMFT) or addiction counselors (LAC).
- If you are an established provider for a patient, it is best practice to conduct a follow-up appointment within seven calendar days of discharge.
- Allow Lucet staff to schedule appointments for members on their behalf, if needed.

Check benefits on iLinkBlue. Some plans waive any out-of-pocket expense for first visit within seven days of discharge from inpatient level of care.
